

HOW THEY WORK

The healing properties of the Hopi EarCandle has its foundation in two primary physical actions. Firstly, the slight underpressure (the chimney effect) inside the EarCandle and the vibration of the rising air column serve to gently massage the ear drum and promote secretion in the frontal and paranasal sinuses. This has an immediate subjective effect of regulating ear pressure. Uses often describe a soothing, light sensation in the ear/head area. Secondly, the locally applied warmth stimulates vascularisation, invigorates the immune system and reinforces the flow of lymph. At the same time, important acupuncture points and reflex zones are stimulated.

The herbs in BioSun EarCandles have been used for centuries for their specific healing qualities.

Camomile as an anti-inflammatory, anti-spasmodic sedative.

Sage as a carminative, astringent and circulatory stimulant which relaxes peripheral blood vessels.

St. John's wort, as a restorative tonic for the nervous system and an analgesic.

All these in combination are very effective in the treatment of head and ear related problems.

SAFE AND PURE

BioSun EarCandles have obtained the prestigious CE mark (93/42-EEC) for medical devices in Europe. No other ear candle in the world has this extraordinary level of certification.

BioSun Hopi EarCandles are crafted in Germany from the highest quality ingredients and are regularly tested at an independent laboratory in Germany. They have been shown to be free of all chemical pesticide and fungicide residues. No other candle worldwide is tested in this way.

CONSUMER ALERT!

There are presently many inferior "home-made" ear candles sold in Australia. These are made from paraffin wax, a petroleum by product, or a mix of paraffin and beeswax. Such candles have no safety features and reports of burns from dripping wax and falling ash are commonplace. For your safety do not use any candle other than safe pure BioSun Hopi EarCandles.
